**Draft Statement of Intent 2008/09**

Screen Australia must develop a clearly articulated service charter which is sensitive to the needs of its clients nationwide.

To this end the organisation must accommodate cultural and geographical diversity and provide effective representation and services to those filmmakers who do not live in Sydney or Melbourne. Ideally this would be done by having some level of regional representation on the Board and equality of access to key decision makers (for example, by basing project in each state) that goes beyond the tokenism of the past.

Kind regards,

Ryan Hodgson

Western Australian Chapter Head, SPAA.
